

The Reconnection and Reconnective Healing

What is Reconnective Healing?

Reconnective Healing is a hands-off form of healing. In fact, the further you move away from the client, the stronger the frequencies get. As we are in the process of a major shift, these new frequencies have come into our realm. These frequencies are initiated and channelled through by the Reconnective Practitioner at the start of a Reconnective Healing session and they continue working with you after your session is over. It is not the Reconnective Practitioner who is the healer, rather the frequencies that are channelled through the Practitioner that elicits the healing.

How long does a session last?

A Reconnective Healing session typically lasts for about 45 minutes. Each session is different and unique.

How many sessions does one need?

Depending on the situation, one to three sessions are highly recommended.

If I have a physical ailment, will this healing clear it?

These frequencies have wisdom far beyond our comprehension.

"If you're lucky, your healing will come in the form you anticipate. If you're really lucky, your healing will come in a form you've not even dreamed of — one which the Universe specifically has in mind for you."

- Eric Pearl

What is the Reconnection?

We have, over time, become disconnected from the Earth and the Universe. The meridian lines in our bodies once connected us to the grid lines of our planet as well as to the grid lines of the entire Universe. The Reconnection connects us to these and new axial lines, thereby bringing in higher frequencies of light and information, raising the vibration levels and frequencies for our healing. Ultimately, these frequencies reconnect our DNA strands raising our evolution to a higher frequency.

"Originally the meridian lines (sometimes called acupuncture lines) on our bodies were connected to the grid lines that encircle the planet and intersect at acknowledged power places such as Machu Picchu and Sedona. These lines continued out and connected us to a vastly larger grid, tying us to the entire universe."

Each ...of our bodies contains its own set of energetic lines and points. Although only remnants of what they once were, these lines and points continue to serve as our interface with the universe: a channel that facilitates our communication of energy, light and information between large and small, macrocosm and microcosm, the universe and humankind. At one point in time, we became disconnected from these lines and we lost the fullness of our inherent connection to the universe, distancing us from our previously rapid and expansive rate of evolution. The Reconnection brings in "new" axial lines that reconnect us on a more powerful and evolved level than ever before. These lines are part of a timeless network of intelligence, a parallel-dimensional system that draws the basic energy for the renewal functions of the human body."

What is involved in having a Reconnection done?

The Reconnection is always done in two sessions, with one day, but preferably NOT more than five days in between. It is advisable, but not necessary to experience a Reconnective Healing session first.

How often can I have a Reconnection?

A Reconnection is a once in a lifetime event. Once you have had a Reconnection, you will never need another one. Also, the same Practitioner has to do both Reconnections. So feel who feels right for you to have your Reconnection done. This is one of the main differences between a Reconnective Healing and a Reconnection. You can have as many Reconnective Healings with various different Practitioners, but only ONE Reconnection. Choose your Practitioner wisely!

For more information, please visit <http://www.thereconnection.com/> or read the book: Dr. Eric Pearl. The Reconnection. Heal Others, Heal Yourself.

Is there any way other than experiencing the Reconnection for myself that I can understand it?

Please check out the testimonial section. There is a taste of what others have experienced. Remember though, we are all unique and therefore our experiences will differ. That is what makes this even more exciting.

With love

Helen
